**MITTLER
REPORT**

SUBMISSION DEADLINE:

July 03, 2026

ACCEPTANCE UNTIL:

August 07, 2026

PRELIMINARY PROGRAM EXPECTED:

August 24, 2026

WORTH KNOWING

- The language of the lectures is English
- Your presentation is typically 25 minutes long
- Q&A or discussions will either take place within these 25 minutes or in a separate time slot within each session. Which of the two options will be used for your presentation depends on the respective session. This will be announced in due time.
- Speakers pay a reduced entrance fee of €72 plus VAT as a cost contribution

CONDITIONS

By submitting a presentation, you agree that your data may be used by the organizers for event organization purposes and shared with all organizations and people involved in the organization, especially with the members of the advisory board. If your paper is accepted, you agree that your personal data (name, company, position, presentation title, portrait photo, presentation content, company logo) may be used for promotional purposes and that photos and videos taken during the event may be used for promotional purposes. You also agree to purchase a discounted speaker ticket for your attendance.

**Airtec: The European Hub for Advancing the Aerospace Supply Chain**

Airtec is Europe's central meeting point for the aerospace supply chain. In civil aviation, it drives the transition to climate-neutral technologies, ensuring all stakeholders adapt successfully. In the defence sector, the focus is on developing forward-looking, future-proof solutions at the highest level of innovation – precisely what Airtec has already been driving in the civil sector. Nowhere else does innovation, excellence, and future development take centre stage as they do at Airtec. Experts from industry, academia, and services meet here to discuss key developments, trends, and applications. More [Details](#).

DefenceTec:**Defence & Security Technologies for Air, Space and Digital Systems. A platform for innovation, emerging technologies and shaping the future ahead**

DefenceTec exclusively addresses defence and security topics with a direct link to aviation and air-based systems. This necessarily includes intelligence, surveillance and reconnaissance, as airborne systems cannot operate without them. It also includes systems designed to counter threats from the air. Within this scope, DefenceTec does not cover tanks, ships or topics related to ground forces. More [Details](#).

Counter-UAS: A new event**with a solution for every drone threat.****Showcasing state-of-the-art technologies across the full counter-UAS spectrum.**

Counter-UAV combines a new conference with a new exhibition area dedicated to counter-drone solutions in both the military and civilian sectors. It gives participants and visitors access to the tools, technologies and capabilities needed to address a wide range of counter-UAV scenarios. At the same time, it showcases the latest trends, new developments and the future direction of this highly important field. More [Details](#).
